

What you believes affects everything you do.  
If you believe there is NO GOD, you'd better be right.  
Romans 1 "Professing themselves to be wise, they became fools . . . "

Dr. George Wald - Prof. of Biology / Harvard University  
1971 Nobel Prize winner in the field of Biology

From: Scientific American, republished: Life, Origins and Evolution, August 1954

"When it comes to the origin of life, we have only two possibilities as to how life arose. One is spontaneous generation arising to evolution; the other is a supernatural creative act of God. There is no third possibility. . . . Spontaneous generation was scientifically disproved one hundred years ago by Louis Pasteur, Spellanzani, Reddy, and others. That leads us scientifically to only one possible conclusion, that life arose as a supernatural creative act of God. . . I will not accept that philosophically because I do not believe in God. Therefore, I choose to believe in that which I know is scientifically impossible, spontaneous generation arising to evolution."

A science professor at the University of Idaho also stated that it does take "more faith" to believe that life came from nothing, but "I refuse to be held accountable to a God."

How about the tens of thousands of chance alterations required at the cellular level to accommodate variations and changes resulting in entirely new species? These supposed changes at many stages would require the formation of appendages, internal organs and systems functions to be completely developed. Development in stages would not be possible sustain life.

The third possibility is that life from another planet (ET theory) started life here on earth. Because of the fact that spontaneous generation has been scientifically proven impossible and that many scientists so called refuse to accept the reality of God, this ET theory will undoubtedly become more widely accepted.

How disheartening it is when those who claim to be objective scientists reject the proof, the evidence, that which is before there very eyes. Proverbs 1:7 "The fear of the LORD is the beginning of knowledge ("science"), but fools despise wisdom and instruction."
